Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Applicant's election with traverse of Group 1, claims 1-26 and 49 in the reply filed on 06/07/04 is acknowledged. The traversal is on the ground(s) that the search for any of the embodiments would of necessity uncover art relevant to the other embodiments . This is not found persuasive because the elected composition could have been made by various methods aside from the non-elected claims namely claims 27-48 and 50-.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-26 and 49 rejected under 35 U.S.C. 102(a) as being anticipated by WO 00/15703.

Art Unit: 1711

4. Patentees disclose a foamed cellular article having the claimed apparent density and the claimed amount of blowing agent after being foamed with a greater amount of blowing agent initially in the foamable composition.

It would have been inherent that the foamed particles would have had the claimed amount of blowing agent after sitting at room temperature after a predetermined time. Note that the abstract calls for a content of 2% organic blowing agent and on page 7 of the patent 4% of the organic blowing agent can be employed in making the foam having the claimed apparent density. Pages 3 and 4 explain the purpose of the foamed polymer having such a high apparent density (so that it can be shipped to another destination and further foamed there to reduce the cost of shipping a higher volume foam).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Morton Foelak whose telephone number is (571) 272-1071. The examiner can normally be reached on Monday thru Friday.
